

Working with Locate Guernsey

Locate Guernsey is the States of Guernsey agency that promotes relocation to the Island and assists those who make the move. Our two key target markets are wealthy individuals who will most likely become Open Market residents and new businesses who may require guidance and assistance in establishing themselves in the Island.

We believe that we can work best when we work with our various stakeholders. This can take a number of forms

- 📍 Joint attendance at events
- 📍 Introductions to your wider team
- 📍 Reciprocal links on websites
- 📍 Partnering in advertising
- 📍 Meeting to discuss activities and opportunities

It's helpful for those new to our island to have a friendly face in Government to act as a guide and problem solver. That's where Locate Guernsey comes in. This shows that Guernsey's Government values newcomers and is keen to help.

Locate Guernsey provides answers to questions so that the move is as smooth as possible. We're happy to help before, during or after any reconnaissance visits.

We can provide guidance on:

- 📍 Employment permits
- 📍 Immigration matters
- 📍 Liaison with Guernsey's planning team
- 📍 Introductions to key senior civil servants or politicians
- 📍 Introductions to social or business groups

We'll work closely with the relocators' Guernsey-based representatives to make sure that between them and Government there's no overlap, and all of their requirements are met. This adds value to the relationship the relocators have with their on-island contact. We won't introduce a relocators to their local representative's competitors.

For those prospective incomers who don't have existing support in Guernsey we can do all of the above, but also make introductions to the Island's many professional services firms. If it's helpful we can put an itinerary together so that their time investigating Guernsey is as enjoyable and productive as possible.

Guernsey is enhanced by the arrival of newcomers. On the States of Guernsey's behalf, Locate Guernsey seeks to underline this by providing a single point of contact and practical help where it's needed.
